DETAILED ACTION

In response to the amendment filed 02/22/2005, claims 1-17 are cancelled; newly added claims 18-35 are pending.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

1. Claims 18-35 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-17 of prior U.S. Patent No. 6767211. This is a double patenting rejection. The claims are substantially identical in such a nature that one could not practice the invention of the instant application with infringing on the patented invention and vice versa. The only terminology difference in the claims is the term "series" in the patented claims and the phrase "at least one" in the pending application. As a series may include only a single item or multiple items the term has the same implications and interpretation as the phrase "at least one".

Response to Arguments

2. Applicant has overcome the previous rejections by amending the claims to recite substantially identical language of the parent patent's claims. Thus for the reason's set forth in the prior application, the examiner has withdrawn the rejections. The examiner also notes applicant's submission of a terminal disclaimer. Although sufficient to overcome the previous obvious type-double patenting rejection, a terminal disclaimer can not over come a statutory double patenting rejection.

Terminal Disclaimer

3. The terminal disclaimer filed on 02/22/5 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of U.S. Patent No. 6767211 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
